

ARIZONA ARSENIC MASTER PLAN

PART 3 - COMPLIANCE OPTIONS

LIST OF TABLES

Table 1.1: Impacted Small Systems by Size in Arizona	page 1-1
Table 1.2: Arsenic Removal Technologies for AMP	page 1-4
Table 1.3: Outline of the Input Form for the Web Tool	page 1-8
Table 1.4: Outline of the Output Form for the Web Tool	page 1-9
Table 2.1: Summary of System Sizes and Impacted POEs (groundwater)	page 2-1
Table 2.2: Summary of Impacted POEs for Small Groundwater Systems Serving <10,000 Persons	after page 2-2
Table 2.3: Summary of Impacted POEs for Large Groundwater Systems Serving <10,000 Persons	after page 2-2
Table 2.4: Summary of Impacted POEs for Small Surface Water Systems Serving <10,000 Persons	after page 2-2
Table 2.5: Summary of Small Water Systems Serving <10,000 Persons With Arsenic Levels >10 ppb	after page 2-2
Table 2.6: Summary of Impacted POEs for Small Surface Water Systems Serving <10,000 Persons With Arsenic Levels Greater Than 8 and Less Than 10 ppb	after page 2-2
Table 3.1: Competing Contaminant Data for Impacted Small Water Systems Serving <10,000 Persons	after page 3-6
Table 3.2: Water Quality Profile Groups	page 3-4
Table 3.3: Summary of Missing Water Quality Data for Impacted Systems Serving <10,000 Persons	after page 3-6
Table 3.4: Summary of Systems with Water Problems that affect Fe-AA treatment	page 3-5
Table 3.5: Summary of Systems with Water Problems that affect GFH treatment	page 3-5

LIST OF TABLES (continued)

Table 3.6: Matrix of Water Quality Classification based on System Size	after page 3-6
Table 4.1: Summary of Fe-AA and Granular Iron Media Design Parameters	page 4-6
Table 4.2: Existing Pilot Testing Data Summary	page 4-10
Table 4.3: Design Criteria for Single Column Fe-AA Treatment (1a and 1b)	page 4-11
Table 4.4: Estimated Capital Costs for Alternative 1a (Single Column Treatment with Fe-AA - direct pumping into system)	page 4-14
Table 4.5: Estimated Annual O&M Costs for Alternative 1a (Single Column Treatment with Fe-AA - direct pumping into system)	page 4-14
Table 4.6: Estimated Capital Costs for Alternative 1b (Single Column Treatment with Fe-AA - pumping into existing on-site storage tank and repumping into system)	page 4-15
Table 4.7: Estimated Annual O&M Costs for Alternative 1b (Single Column Treatment with Fe-AA - pumping into existing on-site storage tank and repumping into system)	page 4-15
Table 4.8: Design Criteria for Single Column Granular Iron Media Treatment (2a and 2b)	page 4-19
Table 4.9: Estimated Capital Costs for Alternative 2a (Single Column Treatment using Iron Media - direct pumping into system)	page 4-20
Table 4.10: Estimated Annual O&M Costs for Alternative 2a (Single Column Treatment using Iron Media - direct pumping into system)	page 4-20
Table 4.11: Estimated Capital Costs for Alternative 2b (Single Column Treatment using Iron Media - pumping into existing on-site storage tank and repumping into system)	page 4-21
Table 4.12: Estimated Annual O&M Costs for Alternative 2a (Single Column Treatment using Iron Media - pumping into existing on-site storage tank and repumping into system)	page 4-21
Table 4.13: Design Criteria for Two Column Fe-AA Treatment (3a and 3b)	page 4-25
Table 4.14: Estimated Capital Costs for Alternative 3a (Two Column Treatment with Fe-AA - direct pumping into system)	page 4-26

LIST OF TABLES (continued)

Table 4.15: Estimated Annual O&M Costs for Alternative 3a (Two Column Treatment with Fe-AA - direct pumping into system)	page 4-26
Table 4.16: Estimated Capital Costs for Alternative 3b (Two Column Treatment using Fe-AA - pumping into existing on-site storage tank and repumping into system)	page 4-27
Table 4.17: Estimated Annual O&M Costs for Alternative 3b (Two Column Treatment using Fe-AA - pumping into existing on-site storage tank and repumping into system)	page 4-27
Table 4.18: Design Criteria for Two Column Fe-AA Treatment (3c and 3d)	page 4-33
Table 4.19: Estimated Capital Costs for Alternative 3c (Two Column Partial Stream Treatment using Fe-AA - pumping into existing on-site storage tank and repumping into system)	page 4-34
Table 4.20: Estimated Annual O&M Costs for Alternative 3c (Two Column Partial Stream Treatment using Fe-AA - pumping into existing on-site storage tank and repumping into system)	page 4-34
Table 4.21: Estimated Capital Costs for Alternative 3d (Two Column Partial Stream Treatment using Fe-AA - pumping into new on-site storage tank and repumping into system)	page 4-35
Table 4.22: Estimated Annual O&M Costs for Alternative 3d (Two Column Partial Stream Treatment using Fe-AA - pumping into new on-site storage tank and repumping into system)	page 4-35
Table 4.23: Design Criteria for Two Column Granular Iron Media Treatment (4a and 4b)	page 4-41
Table 4.24: Estimated Capital Costs for Alternative 4a (Two Column Treatment using Iron Media - direct pumping into system)	page 4-42
Table 4.25: Estimated Annual O&M Costs for Alternative 4a (Two Column Treatment using Iron Media - direct pumping into system)	page 4-42
Table 4.26: Estimated Capital Costs for Alternative 4b (Two Column Treatment using Iron Media - pumping into existing on-site storage tank and repumping into system)	page 4-43

LIST OF TABLES (continued)

Table 4.27: Estimated Annual O&M Costs for Alternative 4b (Two Column Treatment using Iron Media - pumping into existing on-site storage tank and repumping into system)	page 4-43
Table 4.28: Design Criteria for Two Column Granular Iron Media Treatment (4c and 4d)	page 4-47
Table 4.29: Estimated Capital Costs for Alternative 4c (Two Column Partial Stream Treatment using Iron Media - pumping into existing on-site storage tank and repumping into system)	page 4-48
Table 4.30: Estimated Annual O&M Costs for Alternative 4c (Two Column Partial Stream Treatment using Iron Media - pumping into existing on-site storage tank and repumping into system)	page 4-48
Table 4.31: Estimated Capital Costs for Alternative 4d (Two Column Partial Stream Treatment using Iron Media - pumping into new on-site storage tank and repumping into system)	page 4-49
Table 4.32: Estimated Annual O&M Costs for Alternative 4d (Two Column Partial Stream Treatment using Iron Media - pumping into new on-site storage tank and repumping into system)	page 4-49
Table 4.33: System Design Criteria for CF Treatment (5a and 5b)	page 4-52
Table 4.34: Estimated Capital Costs for Alternative 5a (CF Treatment - direct pumping into system)	page 4-55
Table 4.35: Estimated Annual O&M Costs for Alternative 5a (CF Treatment - direct pumping into system)	page 4-55
Table 4.36: Estimated Capital Costs for Alternative 5b (CF Treatment - pumping into existing on-site storage tank and repumping into system)	page 4-56
Table 4.37: Estimated Annual O&M Costs for Alternative 5b (CF Treatment - pumping into existing on-site storage tank and repumping into system)	page 4-56
Table 4.38: Summary of Costs for Centralized Treatment and POU Treatment . .	after page 4-64
Table 4.39: Comparison of Capital Costs	page 4-62
Table 4.40: Comparison of Annual O&M Costs	page 4-63
Table 4.41: Comparison of Annualized Costs	page 4-63
